

October 2024

# Monthly Newsletter

With ongoing improvements, October represented our highest monthly throughput in the second half of 2024. This achievement can be attributed to better planning and stabilisation of our new TOS.

In recent months, we have focussed extensively on upskilling and training, to increase efficiency and productivity levels, which will enable us to serve our Customers better.

As part of our commitment to Employee Development, a batch of 10 Operators was sent to our state-of-the-art Training Centre at Krishnapatnam Port, India, to learn the technical, practical and theoretical aspects of equipment and port operations

We would also like to highlight our Reefer handling capabilities comprised of **194 reefer plugs** at Container Terminal 2.

## Volumes

**68,729 TEUs**

## Vessels Handled

**22 Vessels**

## Average Waiting

**6 Days**
